

New Market Entry & Commercial Expansion

Project Brief & Commercial Proposal

Advanced portfolio engagement for a Greek B2B services company evaluating expansion into a second European market. The project is designed as a structured market-entry decision rather than a claim of completed client work.

Objective	Select and validate the strongest expansion market
Markets assessed	Cyprus, Romania, Bulgaria
Duration	15 business days
Project value	1.200 € + VAT

1. Business Request

The company wants to test international expansion without committing to a local office or permanent team before demand is validated. Management requires a market comparison, target segment, entry model, commercial economics and measurable continuation criteria.

2. Decision Questions

Which candidate market offers the strongest balance of accessibility, demand, competitive intensity and commercial fit? Which customer segment should be approached first? Should entry rely on direct sales, partnerships or a hybrid model? What launch budget and pipeline are required? Which KPIs determine whether expansion continues?

3. Required Inputs

Current services and pricing, customer mix, historical conversion data, delivery capacity, available expansion budget, existing partner relationships, sales resources, revenue targets and operational constraints.

4. Scope of Work

The engagement covers market screening, competitor and pricing review, target-segment prioritization, entry-model design, launch economics, risk assessment and a 90-day commercial roadmap.

Workstream	Core analysis	Output
Market screening	Demand, accessibility, competition, fit	Market scorecard
Competitor intelligence	Offers, pricing signals, positioning	Competitor matrix
Target segment	Need, value, accessibility	Priority ICP
Entry model	Direct, partner and hybrid options	Recommended route
Commercial economics	Budget, pipeline, conversion, break-even	Entry model
Execution	Actions, KPIs, decision gates	90-day roadmap

5. Timeline

Days 1-3: inputs and market screening. Days 4-7: competitor, pricing and segment analysis. Days 8-11: entry model and commercial economics. Days 12-15: risk review, 90-day roadmap and final decision report.

6. Deliverables

Market Attractiveness Scorecard, Competitor & Pricing Matrix, Priority Customer Profile, Market Entry Model, Year 1 Commercial Model, Risk Register, 90-Day Go-to-Market Roadmap and final decision meeting up to 60 minutes.

7. Fee & Terms

Project fee: 1.200 € + VAT. 600 € + VAT at assignment and 600 € + VAT at final delivery. One consolidated revision round is included.

Excluded: legal or tax establishment advice, paid market databases, primary research at scale, local recruitment, advertising spend, travel and implementation of a foreign legal entity.
