

Commercial Performance & Profitability Diagnostic

Project Brief & Commercial Proposal

Advanced portfolio engagement modelling a management diagnostic for an established B2B services company. The purpose is to identify why revenue growth is not translating proportionally into profit and to convert sales, customer and service data into specific management actions.

Objective	Identify profit leakage and improve commercial quality
Analysis period	12 months
Duration	12 business days
Project value	950 € + VAT

1. Business Request

Revenue has increased, but management is seeing pressure on operating profit and cash generation. The company needs to understand which customers and services actually create value, where discounts and delivery effort reduce margin, and which commercial actions should be prioritized.

The assignment is designed as a management diagnostic rather than a reporting exercise. The output must isolate the main profitability drivers and translate them into pricing, customer, service-mix and sales-management decisions.

2. Key Questions

Sales: Which services, customer groups and channels drive revenue growth?

Margins: Where is gross margin being lost through pricing, discounts or delivery effort?

Customers: Which accounts are high-value, low-value or commercially risky?

Portfolio: Which service lines should be protected, repriced, redesigned or reduced?

Management: Which KPIs and actions can improve profitability within the next 90 days?

3. Required Inputs

Twelve months of invoices or sales records, customer list, service or product categories, selling prices, direct delivery costs, discount data where available, sales channel, account ownership, payment terms and basic operating-cost information.

4. Scope of Work

The diagnostic covers revenue quality, gross margin, customer concentration, service-line profitability, discount leakage, customer segmentation, break-even sensitivity and management actions.

Workstream	Analysis	Output
Revenue performance	Trend, mix, growth and concentration	Sales performance view
Margin diagnostic	Gross margin by service and customer	Profitability matrix
Customer economics	Revenue, margin, frequency and concentration	Customer segmentation
Pricing leakage	Discounts and low-margin exceptions	Pricing actions
Service portfolio	Revenue contribution vs profit contribution	Portfolio decisions
Management actions	Priorities, owners and KPIs	90-day action plan

5. Timeline

Days 1-2: data structure and validation. Days 3-5: revenue, margin and customer analysis. Days 6-8: service-line and pricing diagnostic. Days 9-10: management scenarios and recommendations. Days 11-12: final report and management review.

6. Deliverables

Commercial Performance Diagnostic, Customer Profitability Segmentation, Service-Line Profitability Matrix, Pricing Leakage Review, KPI Scorecard, Management Recommendations and 90-Day Profit Improvement Plan.

7. Fee & Terms

Project fee: 950 € + VAT. 475 € + VAT at assignment and 475 € + VAT at final delivery. One consolidated revision round and a final management meeting up to 60 minutes are included.

Excluded: statutory accounting review, tax advice, audit assurance, ERP implementation, CRM implementation and ongoing sales-management execution.
